

## LAB ASSIGNMENT 02

### New Project

1. Projects → New Project → Empty Activity (the application name is TP2\_v1)
2. Run the project on your smartphone

### Project Modification

1. Create a **(layout)** folder under the **(src)** folder
2. Inside the layout folder, create a file named **layout1.xml**
3. In this XML file, create a text **(Second TP)** inside the layout container : `<LinearLayout>`
4. The **Split** mode in Android Studio allows you to see the appearance of the XML file
5. Some modifications are required in the **MainActivity.kt** file
6. Run the application on your smartphone

### Authentication Interface

1. Create an authentication interface similar to Instagram
2. Make the interface as similar as possible

**Note:** The use of ChatGPT (or other tools) is allowed and recommended.
